SUBJECT INDEX

Ab initio calculations
Gas phase acidities of the α amino acids 23
The mechanisms of the gas phase reactions of HO^- with oxirane and HS^- with thiirane. An ab initio study 115
Ultraviolet photoelectron spectroscopy of the phenide, benzyl and phenoxide anions, with ab initio calculations 601
Acidities
Threshold energies for the reactions $OH^- + CH_3X \rightarrow CH_3OH + X^-$ (X = Cl, Br) measured by tandem mass spectrometry: deprotonation energies (acidities) of CH_3Cl and CH_3Br 475
Alcohol–fluoride adduct ions
Fourier transform ion cyclotron resonance investigation of the deuterium isotope effect on gas phase ion/molecule hydrogen bonding interactions in alcohol–fluoride adduct ions 487
Ambident behavior
Gas-phase ambident reactivity of imidate anions ($^-NR_1(CO)R_2$) 345
Amino acids
Correlations of lone pair ionization energies with proton affinities of amino acids and related compounds. Site specificity of protonation 83
Gas phase acidities of the α amino acids 23

Benzene
FT-ICR studies of gas-phase ionic nitration of benzene: the role of electron- and proton-transfer processes 37
Benzyl anion
Ultraviolet photoelectron spectroscopy of the phenide, benzyl and phenoxide anions, with ab initio calculations 601
Bicarbonate ion
Gas-phase thermochemical properties of the bicarbonate and bisulfite ions 565
Bisulfite ion
Gas-phase thermochemical properties of the bicarbonate and bisulfite ions 565
Bonding
Chemical behavior of the gas-phase pentacoordinated carbonium ion, $C_2H_7^+$ 145
Boric acid
Positive ion chemistry of gaseous boric and polyboric acids 47
Branching ratios
Chemistry of C_2^- and HC_2^- with nitrogen, oxygen, and nitrogen oxides 395

C_2^-
Chemistry of C_2^- and HC_2^- with nitrogen, oxygen, and nitrogen oxides 395
$C_2H_4^{\cdot+}$
Proton transfer reactions of $C_2H_4^{\cdot+}$: the bond energy $D(C_2H_3\text{–}H)$ 223
$C_2H_7^+$ ions
Chemical behavior of the gas-phase pentacoordinated carbonium ion, $C_2H_7^+$ 145
CAD
Ion/molecule reactions of *tert*-butyl cation with tertiary alcohols 327
Carbanions
The gas phase ion/molecule chemistry of four carbanions generated from vinylene carbonate and its methyl and dimethyl derivatives 647
Charge reversal process
Experimental evidence for the conservation of an intact carbon skeleton and the intermediacy of a "solvated" hydride ion in the unimolecular dehydrogenation of norborneol alkoxides in the gas phase 15
Charge transfer
Charge transfer between Hg^{2+} and Ar or Kr: reaction rates of various state-to-state processes from selected-ion flow drift tube studies and beam experiments 213
Internal and translational energy effects on the charge-transfer reaction of CO_2^+ with O_2 261
Chemical ionization
An energy-resolved study of the fragmentation of some siloxide ions 185

Positive ion chemistry of gaseous boric and polyboric acids 47
CID
Gas-phase thermochemical properties of the bicarbonate and bisulfite ions 565
Low energy collision induced dissociation: phase-shifting excitation control of ion kinetic energy in ion cyclotron resonance spectrometry 357
Clusters
Studies of reactions of small titanium oxide cluster cations toward oxygen at thermal energies 129
The dynamics of photodissociation of the gas phase $(N_2O \cdot H_2O)^+$ cluster ion 507
CO_2^+
Internal and translational energy effects on the charge-transfer reaction of CO_2^+ with O_2 261
Crossed-beam experiments
Charge transfer between Hg^{2+} and Ar or Kr: reaction rates of various state-to-state processes from selected-ion flow drift tube studies and beam experiments 213
Cyclization
Gaseious $[M - H]^+$ ions of α, ω-diphenylalkanes: cyclization to $[M + H]^+$ type ions of benzocycloalkanes as recognized by chain-length dependent proton exchange 441

Dehydrogenation
Experimental evidence for the conservation of an intact carbon skeleton and the intermediacy of a "solvated" hydride ion in the unimolecular dehydrogenation of norborneol alkoxides in the gas phase 15
Deuterated ammonia
Reactions of protonated water clusters with deuterated ammonia: $H(H_2O)_n^+$ $(n = 1\text{-}4) + ND_3$ 237
Deuterium isotope effect
Fourier transform ion cyclotron resonance investigation of the deuterium isotope effect on gas phase ion/molecule hydrogen bonding interactions in alcohol–fluoride adduct ions 487
Dinitramide ion
Gas phase chemistry of dinitramide and nitroacetylide ions 621
Diphenylalkanes
Gaseous $[M - H]^+$ ions of α, ω-diphenylalkanes: cyclization to $[M + H]^+$ type ions of benzocycloalkanes as recognized by chain-length dependent proton exchange 441
Dynamics
The dynamics of photodissociation of the gas phase $(N_2O \cdot H_2O)^+$ cluster ion 507

Electrospray
An ion source with which ions produced by electrospray can be subjected to ion/molecule reactions at intermediate pressures (10–100 Torr). Deprotonation of polyprotonated peptides 283
Energetics
Thermal energy reactions of H_3^+ and H_2O^+ with a series of small organic molecules 101
Energy effects
Internal and translational energy effects on the charge-transfer reaction of CO_2^+ with O_2 261

FA-SIFT
The gas-phase acidity of hindered amines and some reaction chemistry of their corresponding amide ions 199
Flowing afterglow
Gas phase chemistry of dinitramide and nitroacetylide ions 621
Ligand addition versus substitution in the slow reaction of ^{13}CO with $Mn(CO)_4^-$ in a flowing afterglow apparatus 171
On the protonation and proton affinity of SF_6 387
Studies of the gas phase reactions of protonated methanol with methanol using oxygen-18 and deuterium labeling 65
The gas phase ion/molecule chemistry of four carbanions generated from vinylene carbonate and its methyl and dimethyl derivatives 647
The *ortho*-dehydrophenoxy anion: an unusual ion formed from a surprising reaction 633
Fluorobenzene
The *ortho*-dehydrophenoxy anion: an unusual ion formed from a surprising reaction 633

Fragmentation mechanisms
An energy-resolved study of the fragmentation of some siloxide ions 185
FT-ICR
Fourier transform ion cyclotron resonance investigation of the deuterium isotope effect on gas phase ion/molecule hydrogen bonding interactions in alcohol–fluoride adduct ions 487
FT-ICR studies of gas-phase ionic nitration of benzene: the role of electron- and proton-transfer processes 37
Gas phase substitution of halobenzenes by methylamine and dimethylamine via radical cations 415
Ion/molecule reactions of *tert*-butyl cation with tertiary alcohols 327
Low energy collision induced dissociation: phase-shifting excitation control of ion kinetic energy in ion cyclotron resonance spectrometry 357

Gas phase
Do deprotonated vinylcarbinols undergo [1,3] sigmatropic rearrangement in the gas phase? 1
The *ortho*-dehydrophenoxy anion: an unusual ion formed from a surprising reaction 633
Gaseous $[M - H]^+$ ions of α,ω-diphenylalkanes: cyclization to $[M + H]^+$ type ions of benzocycloalkanes as recognized by chain-length dependent proton exchange 441
Mechanistic insight into the reactions of $O^{\cdot -}$ with aromatic compounds and the synthesis of didehydroaromatic anions in the gas phase 299
Gas phase acidities
Gas phase acidities of the α- amino acids 23
The gas-phase acidity of nitrocyclopropane 557
The gas-phase acidity of hindered amines and some reaction chemistry of their corresponding amide ions 199
Gas phase basicity
Positive ion chemistry of gaseous boric and polyboric acids 47
Gas phase ion chemistry
A selected-ion flow tube study of the reactions of O^+, H^+ and HeH^+ with several molecular gases at 300 K 457
Gas phase reactions
Gas-phase ambident reactivity of imidate anions ($^-NR_1(CO)R_2$) 345
Studies of the gas phase reactions of protonated methanol with methanol using oxygen-18 and deuterium labeling 65
The mechanisms of the gas phase reactions of HO^- with oxirane and HS^- with thiirane. An ab initio study 115
Gas phase substitution
Gas phase substitution of halobenzenes by methylamine and dimethylamine via radical cations 415
Gas phase thermochemical properties
Gas-phase thermochemical properties of the bicarbonate and bisulfite ions 565
Guided ion beam
Internal and translational energy effects on the charge-transfer reaction of CO_2^+ with O_2 261
Guided ion beam mass spectrometry
Reactions of protonated water clusters with deuterated ammonia: $H(H_2O)_n^+$ ($n = 1$–4) + ND_3 237

Halobenzenes
Gas phase substitution of halobenzenes by methylamine and dimethylamine via radical cations 415
HC_2^-
Chemistry of C_2^- and HC_2^- with nitrogen, oxygen, and nitrogen oxides 395
Hg^{2+}
Charge transfer between Hg^{2+} and Ar or Kr: reaction rates of various state-to-state processes from selected-ion flow drift tube studies and beam experiments 213
Hindered amines
The gas-phase acidity of hindered amines and some reaction chemistry of their corresponding amide ions 199
Hybridization
The gas-phase acidity of nitrocyclopropane 557
Hydrogen bonding
Fourier transform ion cyclotron resonance investigation of the deuterium isotope effect on gas phase ion/molecule

hydrogen bonding interactions in alcohol–flouride adduct ions 487

ICR
Positive ion chemistry of gaseous boric and polyboric acids 47

Imidate anions
Gas-phase ambident reactivity of imidate anions ($^-NR_1(CO)R_2$) 345

Ion kinetic energy
Low energy collision induced dissociation: phase-shifting excitation control of ion kinetic energy in ion cyclotron resonance spectrometry 357

Ion source
An ion source with which ions produced by electrospray can be subjected to ion/molecule reactions at intermediate pressures (10–100 Torr). Deprotonation of polyprotonated peptides 283

Ion/molecule reactions
An ion source with which ions produced by electrospray can be subjected to ion/molecule reactions at intermediate pressures (10–100 Torr). Deprotonation of polyprotonated peptides 283
Ion/molecule reactions of *tert*-butyl cation with tertiary alcohols 327
Mechanistic insight into the reactions of $O^{\cdot -}$ with aromatic compounds and the synthesis of didehydroaromatic anions in the gas phase 299
The gas-phase acidity of nitrocyclopropane 557
The gas phase ion/molecule chemistry of four carbanions generated from vinylene carbonate and its methyl and dimethyl derivatives 647
The gas-phase acidity of hindered amines and some reaction chemistry of their corresponding amide ions 199

Isotope effects
Chemical behavior of the gas-phase pentacoordinated carbonium ion, $C_2H_7^+$ 145
Low energy collision induced dissociation: phase-shifting excitation control of ion kinetic energy in ion cyclotron resonance spectrometry 357

Isotopic labelling
Studies of the gas phase reactions of protonated methanol with methanol using oxygen-18 and deuterium labeling 65

Kinetics
A selected-ion flow tube study of the reactions of O^+, H^+ and HeH^+ with several molecular gases at 300 K 457
Charge transfer between Hg^{2+} and Ar or Kr: reaction rates of various state-to-state processes from selected-ion flow drift tube studies and beam experiments 213
Ligand addition versus substitution in the slow reaction of ^{13}CO with $Mn(CO)_4^-$ in a flowing afterglow apparatus 171
On the protonation and proton affinity of SF_6 387
Thermal energy reactions of $OH^- + Cl_2$, Br_2: rate coefficients, product branching fractions and OH product vibrational populations 537

Ligand addition
Ligand addition versus substitution in the slow reaction of ^{13}CO with $Mn(CO)_4^-$ in a flowing afterglow apparatus 171

Ligand substitution
Ligand addition versus substitution in the slow reaction of ^{13}CO with $Mn(CO)_4^-$ in a flowing afterglow apparatus 171

Lone pair ionization energies
Correlations of lone pair ionization energies with proton affinities of amino acids and related compounds. Site specificity of protonation 83

Mechanisms
FT-ICR studies of gas-phase ionic nitration of benzene: the role of electron- and proton-transfer processes 37
Gaseous $[M - H]^+$ ions of α,ω-diphenylalkanes: cyclization to $[M + H]^+$ type ions of benzocycloalkanes as recognized by chain-length dependent proton exchange 441
Mechanistic insight into the reaction of $O^{\cdot -}$ with aromatic compounds and the synthesis of didehydroaromatic anions in the gas phase 299
Studies of the gas phase reactions of protonated methanol with methanol using oxygen-18 and deuterium labeling 65
The dynamics of photodissociation of the gas phase $(N_2O \cdot H_2O)^+$ cluster ion 507

The mechanisms of the gas phase reactions of HO^- with oxirane and HS^- with thiirane. An ab initio study 115
Thermal energy reactions of $OH^- + Cl_2$, Br_2: rate coefficients, product branching fractions and OH product vibrational populations 537
Thermal energy reactions of H_3^+ and H_3O^+ with a series of small organic molecules 101
Methoxybenzene
The *ortho*-dehydrophenoxy anion: an unusual ion formed from a surprising reaction 633
Methyl bromide
Threshold energies for the reactions $OH^- + CH_3X \rightarrow CH_3OH + X^-$ (X = Cl, Br) measured by tandem mass spectrometry: deprotonation energies (acidities) of CH_3Cl and CH_3Br 475
Methyl chloride
Threshold energies for the reactions $OH^- + CH_3X \rightarrow CH_3OH + X^-$ (X = Cl, Br) measured by tandem mass spectrometry: deprotonation energies (acidities) of CH_3Cl and CH_3Br 475
Methylamine
Gas phase substitution of halobenzenes by methylamine and dimethylamine via radical cations 415
MIKES
Ion/molecule reactions of *tert*-butyl cation with tertiary alcohols 327

Nitration
FT-ICR studies of gas-phase ionic nitration of benzene: the role of electron- and proton-transfer processes 37
Nitroacetylide ion
Gas phase chemistry of dinitramide and nitroacetylide ions 621
Nitrocyclopropane
The gas-phase acidity of nitrocyclopropane 557
Nitrogen oxides
Chemistry of C_2^- and HC_2^- with nitrogen, oxygen, and nitrogen oxides 395
Noble gases
Charge transfer between Hg^{2+} and Ar or Kr: reaction rates of various state-to-state processes from selected-ion flow drift tube studies and beam experiments 213
Norborneol alkoxides
Experimental evidence for the conservation of an intact carbon skeleton and the intermediacy of a "solvated" hydride ion in the unimolecular dehydrogenation of norborneol alkoxides in the gas phase 15

$O^{\cdot -}$
Mechanistic insight into the reactions of $O^{\cdot -}$ with aromatic compounds and the synthesis of didehydroaromatic anions in the gas phase 299
Ortho-dehydrophenoxy anion
The *ortho*-dehydrophenoxy anion: an unusual ion formed from a surprising reaction 633
Oxirane
The mechanisms of the gas phase reactions of HO^- with oxirane and HS^- with thiirane. An ab initio study 115

Phase-shifting excitation control
Low energy collision induced dissociation: phase-shifting excitation control of ion kinetic energy in ion cyclotron resonance spectrometry 357
Phenide anion
Ultraviolet photoelectron spectroscopy of the phenide, benzyl and phenoxide anions, with ab initio calculations 601
Phenoxide anion
Ultraviolet photoelectron spectroscopy of the phenide, benzyl and phenoxide anions, with ab initio calculations 601
Photodissociation
The dynamics of photodissociation of the gas phase $(N_2O \cdot H_2O)^+$ cluster ion 507
Polyprotonated peptides
An ion source with which ions produced by electrospray can be subjected to ion/molecule reactions at intermediate pressures (10–100 Torr). Deprotonation of polyprotonated peptides 283
Proton affinities
Correlations of lone pair ionization energies with proton affinities of amino acids and related compounds. Site specificity of protonation 83

Proton transfer reactions of $C_2H_4^{\cdot+}$: the bond energy $D(C_2H_3\text{–}H)$ 223
Proton affinity
On the protonation and proton affinity of SF_6 387
Positive ion chemistry of gaseous boric and polyboric acids 47
Proton exchange
Gaseous $[M - H]^+$ ions of α, ω-diphenylalkanes: cyclization to $[M + H]^+$ type ions of benzocycloalkanes as recognized by chain-length dependent proton exchange 441
Proton transfer reactions
Proton transfer reactions of $C_2H_4^{\cdot+}$: the bond energy $D(C_2H_3\text{–}H)$ 223
Protonated water clusters
Reactions of protonated water clusters with deuterated ammonia: $H(H_2O)_n^+$ $(n = 1\text{–}4) + ND_3$ 237
Protonation sites
Correlations of lone pair ionization energies with proton affinities of amino acids and related compounds. Site specificity of protonation 83

Radical cations
Gas phase substitution of halobenzenes by methylamine and dimethylamine via radical cations 415
Rate coefficients
Chemistry of C_2^- and HC_2^- with nitrogen, oxygen, and nitrogen oxides 395
Thermal energy reactions of H_3^+ and H_3O^+ with a series of small organic molecules 101
Reaction cross-sections
Reactions of protonated water clusters with deuterated ammonia: $H(H_2O)_n^+$ $(n = 1\text{–}4) + ND_3$ 237

Selected-ion drift tube with laser vaporization
Studies of reactions of small titanium oxide cluster cations toward oxygen at thermal energies 129
SF_6
On the protonation and proton affinity of SF_6 387
SIFDT
Charge transfer between Hg^{2+} and Ar or Kr: reaction rates of various state-to-state processes from selected-ion flow drift tube studies and beam experiments 213
Chemistry of C_2^- and HC_2^- with nitrogen, oxygen, and nitrogen oxides 395
SIFT
A selected-ion flow tube study of the reactions of O^+, H^+ and HeH^+ with several molecular gases at 300 K 457
Gas phase chemistry of dinitramide and nitroacetylide ions 621
On the protonation and proton affinity of SF_6 387
Proton transfer reactions of $C_2H_4^{\cdot+}$: the bond energy $D(C_2H_3\text{–}H)$ 223
Studies of the gas phase reactions of protonated methanol with methanol using oxygen-18 and deuterium labeling 65
The gas phase ion/molecule chemistry of four carbanions generated from vinylene carbonate and its methyl and dimethyl derivatives 647
Sigmatropic rearrangements
Do deprotonated vinylcarbinols undergo [1,3] sigmatropic rearrangement in the gas phase? 1
Siloxide ions
An energy-resolved study of the fragmentation of some siloxide ions 185
Solvated hydride ion
Experimental evidence for the conservation of an intact carbon skeleton and the intermediacy of a "solvated" hydride ion in the unimolecular dehydrogenation of norborneol alkoxides in the gas phase 15
Structures
Chemical behavior of the gas-phase pentacoordinated carbonium ion, $C_2H_7^+$ 145

Tandem mass spectrometry
Threshold energies for the reactions $OH^- + CH_3X \rightarrow CH_3OH + X^-$ (X = Cl, Br) measured by tandem mass spectrometry: deprotonation energies (acidities) of CH_3Cl and CH_3Br 475
Tert-butyl cation
Ion/molecule reactions of *tert*-butyl cation with tertiary alcohols 327

Tertiary alcohols
Ion/molecule reactions of *tert*-butyl cation with tertiary alcohols 327
Thermal energy reactions
Thermal energy reactions of $OH^- + Cl_2$, Br_2 : rate coefficients, product branching fractions and OH product vibrational populations 537
Thiirane
The mechanisms of the gas phase reactions of HO^- with oxirane and HS^- with thiirane. An ab initio study 115
Threshold energies
Threshold energies for the reactions $OH^- + CH_3X \rightarrow CH_3OH + X^-$ (X = Cl, Br) measured by tandem mass spectrometry: deprotonation energies (acidities) of CH_3Cl and CH_3Br 475
Titanium oxide
Studies of reactions of small titanium oxide cluster cations toward oxygen at thermal energies 129
Transition metal carbonyls
Ligand addition versus substitution in the slow reaction of ^{13}CO with $Mn(CO)_4^-$ in a flowing afterglow apparatus 171
UV photoelectron spectroscopy
Ultraviolet photoelectron spectroscopy of the phenide, benzyl and phenoxide anions, with ab initio calculations 601
Variable-temperature SIFDT
Internal and translational energy effects on the charge-transfer reaction of CO_2^+ with O_2 261
Vinylcarbinols
Do deprotonated vinylcarbinols undergo [1,3] sigmatropic rearrangement in the gas phase? 1
Vinylene carbonate
The gas phase ion/molecule chemistry of four carbanions generated from vinylene carbonate and its methyl and dimethyl derivatives 647
